Dear Hiring Manager:

I am very interested in the position of Front End/Web Developer Internship. In researching your organization I identified the position on Glassdoor and am excited about this opportunity.

This past summer I worked at Mack Media Group as a web designer. I had focused on responsive websites using CSS and developed the websites with WordPress and used Photoshop to design and modify images.

Currently, I am a Masters student in the Software Engineering program at Fairfield University. I had worked on two web development projects which involved analyzing and outlining for a partnership website between Fairfield University and Cesar A. Batalla High School. The website I designed utilizing HTML5 and created content to promote the partnership. The second project involved designing and programming a fitness website with Asp.Net that includes few function pages and an online store. I worked with 4 team members to develop the project blueprint and build the actual product. I feel that my background and experience will allow me to contribute to your team in creating new web design applications.

This is an exciting position and I would welcome the opportunity to meet with you to discuss my background and experience. Thank you for taking the time to review my application. I look forward to hearing from you.

Sincerely,

Xin Ning
